- Two protective layers: powder coated and galvanized steel
- Separate black plastic inlay with two bait chambers is included
- Optional: Metal snapper plate for 3x mice snapper or 1 rat and 2 mice snapper*

# RODENT-BAITSTATION - RBS 06

The RBS-06 is a heavy-duty, tamper proof bait station, executed in metal. Two protective layers, galvanised steel and a powder coating, offer it a good protection against corrosion.

The RBS-06 is standard executed with a injection moulded inlay, which allows for a safe distribution of rodenticides or baits. Alternatively an optional metal inlay plate is available, which can be used to hold 3 Kness snappers in position.

To be used in combination with:

## A) Baits

## B) Snappers

## Technical specifications

Name	: Rodent bait station RBS-06
Material	: Two protective layers: powder coated and galvanized steel
Finishing	: Round lid, unit without inner or outer sharp edges
Thickness material (mm)	: 1.0
Opening	: Front opening mechanism
Colour	: Grey RAL 7005
Name & warning	: Silk screened on the lid in mono colour
Bait chamber inlay part	: 2 separate, water free, bait chambers, ABS injection molded
