

BAIT-STATION RBS-08

Professional rodent bait stations

RBS-08

RBS-08

The professional rodent bait-stations

Rodent bait stations are commonly used by the pest control industry and food industry to safely offer rodenticides to rodents.

Placed inside the bait chamber of the RBS, these dangerous rodenticides stay in this secured area and avoid that rodenticides end up in unwanted locations, where they could become a threat.

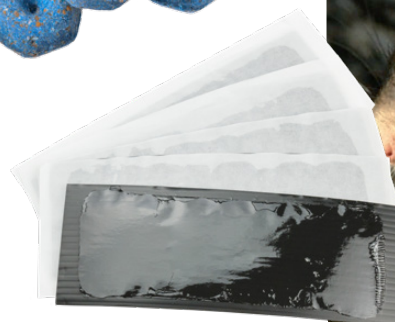

Alcochem Hygiene has developed a range of industrial rodent bait stations, which can be used by professionals across the globe.

These bait stations are produced in ISO 9000 environments, where quality is safeguarded in all steps of the production and transport. The bait stations are packed in bulk packing, optimised for (onward) pallet transports.

The range of bait stations is available in both durable plastic and in a tamper proof metal execution. Furthermore the rodent bait station range comes in different executions & sizes.

To ensure that these bait stations meet nowadays standards, it is important that they:

- A. Comply to safety standards.
- B. Are easy and safe to use
- C. Are tamper proof in both indoor and outdoor locations
- D. That the overall design does not create a threshold barrier for rodents to swiftly enter

Key features:

- Executed with two lock mechanisms
- Discrete & easy to use
- Multifunctional positioning
- Indoor and outdoor use
- Rigid built quality
- Usage on all types of rodenticides
- A long life time

Technical specifications

Name	: Rodent bait station RBS-08
Material	: high grade polypropylene
Finishing	: without inner or outer sharp edges
Thickness material	: 2,5 mm
Color	: black
Inner section	: separate duo food tray and metal bait fixation rod (included)
Safety warning	: placed on the lid in English language
Entrances	: rain protected entrance on 2 sides
Guarantee	: 1 year on mechanical aspects
CE-approval	: yes
Lock	: double safety lock for safe access
Key	: injection molded safety key included per bait station
Mounting position	: free standing or wall mounting (Wall mounting strip included)
Cleaning	: by means of warm water and a soapy detergent

Comparing to the other bait-stations (Alcochem Hygiene)

Bait-station	Dimensions (mm)	Weight (kg)	packing (box)	pcs/pallet
RBS-05 (signal device)	275 x 240 x 125	0,75	per 20	240
RBS-08	230 x 185 x 95	0,54	per 18	468
